Participant Information and Consent Form

Study: Usability of "Day Shift: The Painter", a game for gentle arm exercise
Course: CS 435 Human-Computer Interaction, IIT Gandhinagar (student course project)
Researchers: Akshat A. Nishad, Rudra P. Singh, Laksh Jain, Harshil H Shah
Supervisor: Dr. Yogesh K. Meena

What is this study about?

We are testing a computer game prototype. In the game, you "paint" walls by moving your arm in front of a webcam. We want to learn whether it is easy to understand, comfortable and respectful to use. **We are testing the game, not you.**

What will I do?

- The session takes about **20–25 minutes**.
- You will sit in front of a laptop and do a few short tasks: get set up, follow a short training, paint one or two walls, pause, and change a setting.
- You will be asked to "think aloud" (say what you are thinking).
- At the end there is a short questionnaire.
- The arm movements are gentle and done **seated**. You choose how far to move.

Risks and how we reduce them

Possible risk	What we do
Tiredness or discomfort in the arm	Short session, rest breaks, seated, stop at any time. The game never rushes you.
Pain or dizziness	Stop immediately. A researcher sits with you the whole time.
Privacy (camera)	The camera picture is processed on the laptop only. **No video, photo or audio is recorded or stored.**
Feeling judged	There are no right or wrong answers. We are testing the design.

Your data

- We record only: task times, the number of errors, your questionnaire answers, the researcher's notes, and the game's numeric results (angles, scores).
- You are identified only by a code (for example **P3**). Your name is not linked to your answers.
- We do **not** collect medical history, contact details or any sensitive personal data.
- The anonymised data is used only for the course report and presentation.

Voluntary participation

Taking part is **completely voluntary**. You may stop at any time, skip any question, or ask for your data to be removed, without giving a reason and without any consequence.

Consent (tick each box)

☐ I have read (or had read to me) the information above, and my questions have been answered.
☐ I understand that participation is voluntary and that I can stop at any time.
☐ I understand that no video, photo or audio of me will be recorded or stored.
☐ I agree that my anonymised answers and task results may be used in the course report.
☐ I confirm that I currently have no pain or medical advice that prevents gentle arm movement.

Signature or verbal consent witnessed by (researcher): _____

हिन्दी सारांश

यह एक छात्र प्रोजेक्ट है। हम एक कंप्यूटर गेम की जाँच कर रहे हैं, जिसमें आप कैमरे के सामने हाथ हिलाकर दीवार "रंगते" हैं। आपकी नहीं, गेम की जाँच हो रही है।

- सत्र लगभग 20–25 मिनट का है।
- आप बैठकर हल्का व्यायाम करेंगे।
- कोई वीडियो, फ़ोटो या आवाज़ रिकॉर्ड नहीं होती।
- आपकी पहचान केवल एक कोड (जैसे P3) से होगी।
- भाग लेना पूरी तरह स्वैच्छिक है। आप कभी भी रुक सकते हैं।
- दर्द या चक्कर हो तो तुरंत बताएँ।
